

Eric Toogood

Director
DISKOS Manager
Norwegian Petroleum Directorate

Eric Toogood works for the Norwegian Petroleum Directorate (NPD) and is the Manager of DISKOS, a joint industry initiative for the reporting and custodianship of petroleum data from the Norwegian Continental Shelf. Eric has over 30 years experience in the oil and gas industry, working in various managerial roles in data and information management. He has been involved in a number of data and information management initiatives in collaboration with the Norwegian Oil and Gas Association and EPIM (Exploration & Production Information Management Association).

Eric sits on the Management Committee of ECIM (Norwegian Expert Center for Information Management) and is on the organizing committee of the annual ECIM Data Management Conference. Eric has also been involved National Data Repository (NDR) initiative for many years and has also worked on various standardization initiatives in POSC and Energistics. Before moving into the field of information management Eric worked in medical research on blood cell physiology, at the University of Oslo.

Eric has BSc from the Norwegian School of Library and Information Science (1982) and a H.N.D. in Applied Biology from Leicester Polytechnic (1973).
