

Paul Zeppenfeldt

Director

**VP FOR SUBSURFACE & WELLS SOFTWARE
(PROJECTS & TECHNOLOGY)**

Shell

Paul Zeppenfeldt leads Shell's Subsurface Technology organization which delivers the competitive technology edge for Shell in the areas of geophysics, geology, petrophysics, reservoir engineering, reservoir modelling, subsurface data integration including digitalisation through a global organization of some 400 staff. Value is created by strong upfront business alignment on the technology portfolio. Early agreement on research effort, support models, economics and deployment targets are all key ingredients to achieve a high level of technology replication.

Paul has an MSc in Aerospace Engineering from Delft University, joined Shell in 1991 and held prior operational, reservoir engineering, development planning and JV management assignments in UK, Germany, Saudi Arabia and Russia.
