

David Johnson

Director

Chief Technology Officer

Petrolink

David C. Johnson is the Chief Technology Officer and member of the board of Petrolink. Prior to that, he was Vice-president of Research and Innovation. He has worked for more than 20 years as a developer, designer, database administrator, real-time advisor and product manager for companies including Landmark, Halliburton and Kongsberg. David has been active in industry data standards including the Energistics community since its inception and previously held the position of cochair of the WITSML special interest group. He joined the energy industry as a software designer and developer in Canada, later moving to the United States to manage a team of people providing data management and engineering technologies. David graduated with a BSc in Computer Science from the University of Lethbridge, Alberta, Canada with specialty in databases and data management.
